

KU SCHOOL OF HEALTH PROFESSIONS

Health Information Management

AT A GLANCE

Health information management is the study of acquiring, analyzing and protecting information vital to providing quality patient care. Highly in demand, these professionals demonstrate leadership and management of health information in many forms. KU offers a Bachelor of Science in Health Information Management as a two-year degree program, as well as a flexible progression program for individuals holding the RHIT credential.

DEGREE PROGRAMS TO FIT YOUR NEEDS

- Bachelor of Science in Health Information Management

In KU's two-year B.S. program on the KU Medical Center campus in Kansas City, Kan., students work with the latest technology at a top academic institution sharing a complex with the region's premier academic health center, The University of Kansas Hospital. Students are eligible for admission after two years of undergraduate study at an accredited institution.

- RHIT Progression Program

A two-year, online program for working RHIT professionals to earn a bachelor's degree.

- Joint Bachelor of Science/Masters Program

By participating in the intensive, full-time bridge program, students can achieve both degrees in five years. Students pursuing the BSHIM/MHSA will be prepared to assume management and executive positions in health-related organizations and to bring their expertise in health information management to these positions.
